

Dear Sir:

Our wireless products (Product name: Wireless Access Point, Model number: WA2210-AG, WA2220-AG, WA2220E-AG, WA2210X-G, WA2220X-AG, WA2220X-AGP) are base on country's requirement of customer to setup wireless channel. For different country, we have different country code to setup. The country code is fixed and user can't change it. However, for the United States, Channel 100 to Channel 140 can not be used for all above products.

Best regards.

Sun Li
